## LETTER OF REFERENCE

Mr. Tuan Anh Pham Le, born on December 5, 2002, in Ho Chi Minh City, Vietnam, graduated from the Ho Chi Minh City University of Industry and Trade with a Bachelor of Engineering in Software Engineering. Although he has not yet been employed by any company, he was independently contracted by H.A.T Tours and Service Company Limited to develop their official website. He worked on this project as a *working student* from January 26, 2025 to June 26, 2025.

H.A.T Tours and Service Company Limited (CÔNG TY TNHH DỊCH VỤ VÀ DU LỊCH H.A.T), established on June 13, 2022, and officially licensed for international tourism services on July 15, 2022 (Business License No. 031 733 7394), is a Vietnamese travel agency registered with the Department of Planning and Investment of Ho Chi Minh City. The company specializes in offering a wide range of domestic tours, travel services, and customer-focused travel experiences throughout Vietnam. Further information is available on the company's official website: <https://dulichhat.com>.

Mr. Tuan Anh Pham Le played a key role in designing, developing, and deploying the company's official website <https://dulichhat.com> which serves as a digital platform for:

- Showcasing the company's profile and legal information
- Introducing a wide selection of domestic travel tours
- Presenting detailed tour content and itineraries
- Publishing blog posts, company announcements, and multimedia galleries
- Allowing public access to customer feedback images and organized tour categories

From a technical perspective, Mr. Tuan Anh independently designed, developed, and deployed the company's website using ASP.NET MVC (C#) on Visual Studio 2022, following the Model-View-Controller architecture. He built a responsive, user-friendly interface compatible with both desktop and mobile platforms, integrated dynamic routing, multilingual support, a secure admin panel, and managed backend functions such as tour management, content scheduling,

image galleries, and search. The final product was deployed on a Windows-based hosting environment using Plesk panel.

Throughout the project, Mr. Tuan Anh demonstrated strong technical competence, a proactive mindset, and the ability to deliver practical, user-centered solutions that aligned with real business needs. His deep understanding of web development, commitment to quality, and eagerness to learn made him a valuable contributor.

In addition to core development, he also:

- Integrated Google reCAPTCHA for secure staff login at <https://dulichhat.com/admin>
- Implemented eFinder for managing tour and feedback image directories
- Used TinyMCE as the content editor for blog and tour descriptions
- Configured Google Search Console to ensure SEO optimization and content indexing
- Registered and configured the domain name via PA Vietnam

These enhancements contributed to a secure, scalable, and content-rich platform that reflects modern web development practices and meets the company's operational needs. Mr. Tuan Anh's initiative in selecting and integrating these tools independently demonstrated his practical technical knowledge and ability to deliver a complete solution from development to deployment.

He maintained a high standard of communication and professionalism throughout his time at the company. We particularly appreciate his ability to work independently, manage complex tasks, and respond positively to feedback. He also collaborated well with the team and adapted quickly to changing project requirements.

Mr. Tuan Anh's contribution was highly valued, and we were completely satisfied with his performance. We sincerely thank him for his great work.

Ho Chi Minh City, June 26, 2025

Le Hoang Tan  
CEO – H.A.T Tours and Service Co., Ltd
